About Grandstream

Overview

Grandstream has been connecting the world since 2002 with unified communications and networking solutions that allow businesses to be more productive than ever before. Our award-winning solutions serve the small-to-medium business, service provider and enterprise markets and have been recognized throughout the world for their quality, reliability and innovation. Grandstream solutions are used in over 150 countries because they lower communication costs, increase security protection and enhance productivity.

Corporate Structure

Privately held with over 500 employees worldwide and profitable with strong 2-digit compound annual growth rate in sales since 2002.

Mission Statement

We believe in connecting the world. We believe every business, large or small, should have the tools to communicate from anywhere on any device, and we design products that make this belief a reality.

Competitive Advantages

- Comprehensive portfolio of UC, VoIP, networking & facility management solutions - build a full solution all under the Grandstream brand
- One of the original SIP manufacturers - unrivaled expertise, quality and reliability as a result
- Open-source, zero-configuration plug-and-play technology for easy deployment and broad interoperability with SIP products and services
- State-of-the-art voice and video algorithms for crystal clear audio and video communications

GRP Series Carrier-Grade IP Phones

The GRP2600 Series are carrier-grade IP phones designed for mass deployment. This series of next-generation IP phones features a sleek new design, a reimagined user experience, unified firmware and powerful feature options. Designed for enterprises, service providers and other high-volume markets, the GRP Series offers a powerful, easy-to-use and easy-to-deploy voice platform with next-gen features for high-end users.

Common Deployments

Key Features

Integrated dual-band Wi-Fi

Built-in Bluetooth for headsets, data exchange & more

A variety of digital multi-purpose keys

Customizable faceplates

Secure boot, dual firmware, encrypted data storage

GDMS

Cloud management with GDMS

Made for Easy Management and Mass Deployment

The GRP Series was designed for mass deployments. It provides zero touch provisioning and easy cloud management with GDMS, offer unified firmware across the entire line, and feature swappable faceplates for easy logo customization. By adding a suite of next-gen features, the GRP Series is ideal for enterprises, service providers and other large deployments.

US\$ 158.00

GRP2670 - 12-Line Professional IP Phone

12 lines, 6 SIP accounts

WP Series Cordless Wi-Fi IP Phones

The WP Series enables businesses to create mobile VoIP solutions that utilize immersive Wi-Fi networks to support roaming throughout any facility. Designed to suit a variety of vertical market applications, the WP Series offers powerful features, mobility, door access management and durability to support mobile work environments.

Common Deployments

Key Features

Dual-band Wi-Fi with advanced roaming support

HD voice & dual MIC with background noise shield

Customizable button for PTT, panic, etc.

Rechargeable batteries

Built-in Bluetooth for headsets & data exchange

GDMS

Cloud management with GDMS

Mobilize Your VoIP Network

The WP Series provides businesses with the ability build mobile VoIP networks that empower employees to roam around an entire facility while still being able to make and receive calls. These wireless voice networks are easy to install and manage because they utilize immersive Wi-Fi networks, allowing workers to roam throughout any office, warehouse, site, retail store and more. Also, our GWN Series of Wi-Fi APs offer QoS to prioritize voice connections over Wi-Fi.

WP825 - Ruggedized Cordless Wi-Fi IP Phone

 HD voice & dual MIC design with AEC and Noise Shield Technology
 Rechargeable 1500mAh battery, 7.5 hour talk time, 150-hour standby
 Accelerometer and configurable button for push-to-talk
 Micro USB port and 3.5mm headset jack
 Supports custom Android apps that fit the phone's screen/keys
 Battery charger available (GMC08) that can charge up to 8 batteries at a time

WP810 - Basic Cordless Wi-Fi IP Phone

US\$85.00

2 SIP accounts, 2 lines
 Dual-band Wi-Fi with efficient antenna design and advanced roaming support
 HD voice & dual MIC design with AEC and Noise Shield Technology
 Rechargeable 1500mAh battery, 6 hour talk time, 120-hour standby
 Micro USB port and 3.5mm headset jack
 Battery charger available (GMC08) that can charge up to 8 batteries at a time

DP Series DECT Cordless IP Phones

The DP Series offers a variety of DECT handsets and base stations that enable businesses to create affordable cordless VoIP solutions that support office mobility. By featuring robust telephony features, range up to 400 meters outdoors and 50 meters indoors, color-screen LCDs and more, the DP Series allows any business to mobilize their VoIP network.

Common Deployments

Key Features

Up to 10 SIP accounts per system & handset

HD audio & full-duplex speakerphones

Push-to-talk and panic button options on most models

Rechargeable batteries

DECT authentication & encryption technology

Cloud management with GDMS

Cordless Solutions for Small & Medium Spaces

The DP Series provides a high-quality and cost-effective cordless solution to mobilize VoIP networks in any small-to-medium space. We offer 3 cordless DECT handsets that pair with either the DP750 or DP752 base station to support a range of up to 400 meters outdoors and 50 meters indoors.

DECT Handsets

US\$77.00

DP730 - 400m Range DECT Cordless IP Phone

10 SIP accounts, 10 lines
3-way voice conferencing
Supports a range of up to 400 meters outdoors and 50 meters indoors
Supported by DP752 and DP750 base stations
2.4 inch (240x320) color TFT LCD display
Offers 40-hour talk time and 500-hour standby time
Dedicated push-to-talk button, built-in proximity and accelerometer sensors
HD audio on the speakerphone, handset, and headset jack

US\$46.00

DP722 - 350m Range DECT Cordless IP Phone

10 SIP accounts, 10 lines
3-way voice conferencing
Supports a range of up to 350 meters outdoors and 50 meters indoors
Supported by DP752 and DP750 base stations
1.8 inch (128x160) color TFT LCD display
Offers 40-hour talk time and 500-hour standby time
Configurable push-to-talk button
HD audio on the speakerphone, handset, and headset jack

US\$46.00

DP720 - 350m Range DECT Cordless IP Phone

10 SIP accounts, 10 lines
3-way voice conferencing
Supports a range of up to 350 meters outdoors and 50 meters indoors
Supported by DP752 and DP750 base stations
1.8 inch (128x160) color TFT LCD display
Offers 40-hour talk time and 500-hour standby time
HD audio on the speakerphone, handset, and headset jack

DECT Base Stations

US\$43.00

DP752 - Long-Range DECT VoIP Base Station

Up to 10 SIP accounts per system; up to 10 lines per handset
 Pairs with up to 5 of Grandstream's DP series DECT handsets via instant pairing
 Outdoor range of up to 400 meters with the DP730
 Outdoor range up to 350 meters with DP722/DP720
 Indoor range up to 50 meters
 Supports handset Push-to-Talk
 Supports activity based on proximity and accelerometer sensors
 Offers multiple ring group options including: circular, linear, parallel and shared
 Automated provisioning options include TR-069 and XML config files

US\$43.00

DP750 - Long-Range DECT VoIP Base Station

Up to 10 SIP accounts per system; up to 10 lines per handset
 Pairs with up to 5 of Grandstream's DP series DECT handsets via instant pairing
 Outdoor range of up to 300 meters
 Indoor range up to 50 meters
 Supports handset Push-to-Talk
 Supports activity based on proximity and accelerometer sensors
 Offers multiple ring group options including: circular, linear, parallel and DID
 Automated provisioning options include TR-069 and XML config files

US\$94.00

DP760 - Long-Range Wideband DECT Repeater

Up to 2 concurrent HD calls
 Extends an additional range of 300m outdoors and 50m indoors
 Automatic or manual association to DP750/DP752 base stations for easy use
 Plug-n-Play features like auto association, auto region detection
 Seamless call handover
 Automated provisioning options include XML config files
 Integrated PoE

UCM Series IP PBXs

A powerful yet easy to manage voice, video, data, and mobility communications platform has never been more achievable than with Grandstream's Series of UCM IP PBXs. The UCM Series offers an extensive set of unified communication features in an easy-to-manage on- premise solution with no licensing fees, upgrade fees or costs per feature. Our UCMs range from small and medium business deployments to small and medium enterprise solutions.

Common Deployments

Key Features

3000 users
Supports
500 -3000 users

zero CONFIG
Auto-discovery & Zero
config provisioning

Advanced, customizable
voice & call routing

Supports any SIP video
device & service

Enterprise-grade data
tools including reports,
CDR, and more

A variety of mobility
options allow users to
be reached anywhere

Powerful Unified Communication and Collaboration Solutions that Scale

With the UCM Series, businesses can build state-of-the-art voice, video, data and mobility solutions that can easily be scaled. The Series offers models that support up to 3000 users, and multiple UCMs can be peered together to increase capacity. Users get access to thousands of features, which are always being expanded.

UCM6300 Series - IP PBXs for up to 3000 Users

- **UCM6301 - US\$261.00**
- **UCM6302 - US\$366.00**
- **UCM6304 - US\$744.00**
- **UCM6308 - US\$1,026.00**

UCM6300A Series - Audio Focused IP PBXs

- **UCM6300A - US\$218.00**
- **UCM6302A - US\$289.00**
- **UCM6304A - US\$452.00**
- **UCM6308A - US\$744.00**

DESCONTINUADO

UCM6510 - IP PBX for up to 2000 Users

Supports up to 2000 users, 200 concurrent calls and 64 conference attendees
 1GHz quad-core Cortex A9 processor
 1GB DDR3 Ram, 32GB Flash
 Integrated T1/E1/J1 interface
 2 PSTN trunk FXO ports
 2 analog telephone/Fax FXS ports with lifeline capability
 Security protection using SRTP, TLS and HTTPS encryption
 Auto Discovery and Zero Configuration of Grandstream SIP endpoints

DESCONTINUADO

HA100 - Failover solution for the UCM6510 IP PBX

Connects and constantly monitors two UCM6510 together for high availability
 Smart failover solution that automatically switches to a hot-standby secondary UCM6510 if the primary one fails
 Up to 14 LED indicators showing real-time status of all of the telecom lines, network links, auxiliary devices, etc
 Gratuitous ARP forces SIP endpoints to refresh the MAC address of the new UCM6510 without interruptions
 Fast 10 to 50 second system switching time depending on the number of registered endpoints

The UCM6300 Ecosystem is a solution bundle that elevates the UCM6300 series IP PBXs to easily and securely reach outside of the on-site network to support remote workers. First, UCM RemoteConnect is a cloud-based service to enable secure remote access and device management to businesses using the UCM6300 series. It provides zero-touch NAT firewall traversal for remote users and devices while offering IT professionals a secure tool to easily manage the UCM6300 series, registered endpoints, and remote users. Next, the Wave provides a powerful voice and video collaboration platform for remote users within a UCM6300 series IP PBX, available on desktop and mobile. Together, the UCM6300 series, UCM RemoteConnect, and Wave provide any organization with a powerful, easy-to-manage, and flexible communication and collaboration solution.

UCM RemoteConnect - NAT Firewall Traversal

Cloud-based NAT firewall traversal service; runs on AWS
 Productive meetings, calls, and conferences with the included Wave app
 Offers secure connections with remote SIP endpoints registered to a UCM6300 IP PBX
 Provides built-in tools for IT-friendly secure management of remote devices
 Integrated with GDMS for centralized management of remote devices
 Built-in advanced system and device monitoring & diagnosis tools
 Provides advanced system and device reports and real-time email alerts
 Free plans available; offers cloud storage, reports, alerts, & more

Wave App - Mobile and Web Collaboration App

Supports Android & iOS devices; Chrome and Firefox browsers
 Remotely join meetings, calls, and conferences
 Compatible with Wi-Fi and 2G/3G/4G networks
 Allows UCM6300 series users to call other extensions, landlines, and mobile numbers
 Schedule and start meetings from the app
 Supports PC and mobile built-in cameras & USB webcams
 Supports video resolutions up to 1080p HD
 Supports use with Bluetooth, USB, and other headsets
 Compatible with UCM RemoteConnect cloud service for secure remote connections

Audio Conferencing Solutions

Grandstream has everything that any business needs to create a powerful yet affordable video & audio conferencing solution. The GVC Series of Video Conferencing devices and GAC Conferencing Phone empower any business with a robust and affordable Android-based collaboration environment that offers platform flexibility. If you are looking to build a solution, our IPVideoTalk cloud platform and IPVT10 on-premise server provide competitive and easy-to-deploy options.

US\$512.00

GAC2570 - Enterprise Conferencing Phone

Full-duplex speakerphone with HD acoustic chamber & advanced echo cancellation
10-watt high-fidelity speaker
12 omnidirectional microphones with MMAD (Multichannel Microphone Array Design)
Runs on Android 10
Built-in Bluetooth 5.0
Integrated dual-band Wi-Fi 6
Supports 5m pickup range
Can be paired with two GMD1208 desktop wireless microphones up to 20m range
Supports 12 party conferencing

US\$274.00

GAC2500 - Audio Conferencing Phone

HD audio to maximize audio quality
Runs on Android 4.4
Built-in Bluetooth
Integrated Wi-Fi support
3 cardioid microphones with 12ft. pickup distance
4.3 inch (800x480) capacitive touch screen
Supports 6 SIP accounts and 7-way voice conferencing
3.5mm audio port, USB Micro-B, RJ48 daisy chain port

GDS Series Facility Access Solutions

The GDS Series of Facility Access Systems tracks and manages access to any physical building and provides a dedicated audio and/or video intercom. Thanks to its integration with other Grandstream endpoints, the GDS Series offers a complete end-to-end solution for access control, video/audio intercom, and security needs.

Common Deployments

SMB

Enterprise

Education

Warehouses

Key Features

GDS3710 and GDS3712 offers 1080p HD resolution

RFID chip reader for keyless entry

IP66 weatherproof casing

Built-in HD Speaker loudspeakers

HD mics with acoustic echo cancellation (AEC)

Make SIP calls to IP voice & video phones

Track, Manage & Record with GDS Manager; Control with IP Phones

By combining the GDS Series with our free GDS Manager software and Grandstream IP voice and video phones, businesses can create an integrated facility access and security solution. GDS Manager offers a centralized management and tracking platform, while Grandstream endpoints enable permitted users to have intercom conversations and open doors with any GDS device, right from their desktop phone.

Facility Access Devices

US\$170.00

GDS3712 - HD IP Video Intercom System

Video resolutions up to 1080p
 2 Relay for electric lock and alarm out, 2 alarm in button for exit door and sensor
 SIP video streaming to NVRs, video intercom stations, IP phones, or smart phones
 Built with a metal casing to make it weatherproof and vandal resistant
 Built-in hemispheric camera allows for 180-degree wall-to wall coverage
 Supports motion detection
 Integrated PoE to power the device and provide a network connection
 Built-in microphone and speaker offers voice options and intercom functionality
 ONVIF Profile S compliant

US\$207.00

GDS3710 - HD IP Video Door System

Video resolutions up to 1080p
 Built-in RFID chip reader for keyless entry
 SIP video streaming to NVRs, video intercom stations, IP phones, or smart phones
 Built with a metal casing to make it weatherproof and vandal resistant
 Built-in hemispheric camera allows for 180-degree wall-to wall coverage
 Supports motion detection
 Integrated PoE to power the device and provide a network connection
 Built-in microphone and speaker offers voice options and intercom functionality
 ONVIF Profile S compliant

US\$128.00

GDS3705 - IP Audio Door System

HD audio options with up to 1.5m of audio input and 3m of audio output
 Built-in RFID chip reader for keyless entry
 Supports SIP calls to IP phones to facilitate communication
 Built with a metal casing to make it weatherproof and vandal resistant
 Integrated PoE to power the device and provide a network connection
 Built-in dual microphone and HD loudspeaker with advanced AEC
 ONVIF Profile S compliant

US\$103.00

GDS3702 - HD Audio IP Intercom System

HD audio options with up to 1.5m of audio input and 3m of audio output
 Supports SIP calls to IP phones to facilitate communication
 Built with a metal casing to make it weatherproof and vandal resistant
 Integrated PoE to power the device and provide a network connection
 Built-in microphone and HD loudspeaker with advanced AEC
 ONVIF Profile S compliant

Facility Access Management Software

GDS Manager - Free Management Software

Free Windows-based management software for GDS3710 and GDS3705
View real-time and recorded audio/video from the GDS3710/3705
Door access management
RFID card management
Attendance reports, analytics, and more
Features client/server architecture
Download at grandstream.com/support/tools

Facility Management & Security Solutions

Grandstream offers a variety of products that allow businesses to easily manage their facility while also keeping it safe and secure. The GSC series includes SIP intercom and paging solutions, IP cameras, and a touch-screen facility control station. Ideal for office buildings, enterprises, schools, healthcare facilities, retail centers, residential settings, warehouses and similar environments, our solutions allows businesses to build easy-to-manage management and security platforms that can be integrated with IP phones to expand communication.

Common Deployments

Enterprise

Education

Retail

Hospitality

Key Features

Intercom & PA devices feature full-duplex HD speakers

Built-in directional mics

Multiple models support dual-band Wi-Fi

A variety of inputs & outputs to integrate third party devices

Cameras offer 1080p HD video resolution

10/100 Mbps ports with PoE

Add Intercom, PA & Video Security to Any VoIP Solution

The GSC3516, GSC3510, GSC3506 and the GSC3505 allow businesses to add intercom and/or public address functionality to any VoIP network, while the GSC3620, GSC3615 and GSC3610 add video surveillance to any VoIP solution. These devices are added to a network as SIP extensions. Meanwhile, the GSC3570 adds a dedicated station to manage intercom, paging, facility access, surveillance cameras and more.

PROXIMAMENTE

GSC3516 -SIP/Multicast Talk-Back Speaker

Full-band and wide-band audio codec support including Opus & G.722 High-fidelity 15W HD Speaker
 Integrated dual-band 802.11 a/b/g/n/ac WiFi and Bluetooth
 One 10/100Mbps network port with PoE/ PoE+
 Full-duplex speakerphone with HD acoustic chamber, advanced acoustic echo cancellation
 3 directional mics with MMAD & microphone beamforming array and 1 omnidirectional auxiliary microphone
 2-pin multi-purpose input to support peripherals including call buttons

PROXIMAMENTE

GSC3506 -SIP/Multicast Intercom Speaker

1-way public address SIP speaker
 Full-band and wide-band audio codec support including Opus & G.722 High-fidelity 30W HD Speaker
 One 10/100Mbps network port with PoE/ PoE+
 Full-duplex speaker with HD acoustic chamber
 Features SIP paging, multicast paging, call-waiting with priority override 2-pin multi-purpose input to support peripherals including call buttons

3510 - US\$158.00

3505 - US\$138.00

GSC3510 & GSC3505 -SIP Intercom & PA Speakers

GSC3510: SIP Intercom Speaker and Microphone
 GSC3505: 1-Way Public Address SIP Speaker
 Full-band and wide-band audio codec support including Opus & G.722
 Integrated dual-band 802.11 a/b/g/n WiFi and Bluetooth
 One 10/100Mbps network port with PoE/ PoE+
 Full-duplex speakerphone with HD acoustic chamber (GSC3510)
 3 directional mics with MMAD & microphone beamforming array (GSC3510)
 2-pin multi-purpose input to support peripherals including call buttons (GSC3510)

US\$122.00

GSC3570 -HD Intercom & Facility Control Station

Dedicated device for managing door access, intercom, paging, security and more
 7 inch 1024x600 touch screen
 Dual-band 802.11ac Wi-Fi, supports 4 SIP accounts
 4 alarm input ports and 1 alarm output port for customized deployments
 Full duplex 2-way HD audio with advanced echo cancellation
 Secure booth & data, TLS and SRTP encryption technology
 Wall mountable or place on a desktop, Integrated PoE

GWN Series Networking Solutions

The GWN Series of Networking Solutions allow businesses to build powerful and secure Wi-Fi networks with wide coverage range and industry-leading security features. They are supported by a variety of free management tools, including built-in controllers, our GWN.Cloud platform and GWN Manager software. All GWN Series products offer an industry-leading 3-Year Warranty.

Common Deployments

Key Features

Dual-band MU-MIMO maximizes speeds

Embedded controller built-in to all APs (aside from GWN7602)

Secure boot, critical data lockdown, unique security certificates, etc.

Gigabit ports support speeds from 1.27 - 3.55 Gbps (based on model)

Ensure real-time performance of critical apps

Free and unlimited cloud management with GWN.Cloud

Powerful Wi-Fi Networks and Free Management Options

Not only do we provide a portfolio of enterprise-grade Wi-Fi APs, Managed network switches and routers, but we also offer a range of free management tools. Most GWN Series APs uniquely include an embedded controller in their web UI, GWN.Cloud offers a free cloud platform that supports unlimited devices, and GWN.Manager provides a free software Wi-Fi management platform.

Wi-Fi Access Points

US\$165.00

GWN7664 - 802.11ax Wi-Fi 6 Access Point

Wi-Fi 6

Dual-band 4x4:4 MU-MIMO with DL/UL OFDMA technology

Support 750 concurrent Wi-Fi client devices

3.55Gbps aggregate wireless throughput, 3.5Gbps aggregate wired throughput

Up to 175-meter coverage range

Advanced QoS to ensure real-time performance of low-latency applications

Anti-hacking secure boot and critical data/control lockdown

Embedded controller, GWN.Cloud, and GWN Manager to manage APs

Self power adaptation upon auto-detection of PoE or PoE+

US\$184.00

GWN7664LR - High Performance Outdoor Long Range Wi-Fi 6 Access Point

Wi-Fi 6

Up to 300-meter coverage range

Supports 750+ concurrent Wi-Fi client devices

Dual-band 4x4:4 MU-MIMO with DL/UL OFDMA technology

3.55Gbps aggregate wireless throughput and 2x Gigabit Ethernet ports

4 detachable/ changeable antennas for different application scenarios

Self-power adaptation upon auto detection of PoE or PoE+

Advanced QoS to ensure real-time performance of low-latency applications

Anti-hacking secure boot and critical data

Embedded controller, GWN.Cloud, and GWN Manager to manage APs

IP66-level weatherproof capability when installed vertically

US\$93.00

GWN7660 - 802.11ax Wi-Fi 6 Access Point

Wi-Fi 6

Dual-band 2x2:2 MU-MIMO with DL/UL OFDMA technology

1.77Gbps aggregate wireless throughput and 2x Gigabit Ethernet ports

Up to 175-meter coverage range

Supports 256 concurrent Wi-Fi client devices

Advanced QoS to ensure real-time performance of low-latency applications

Anti-hacking secure boot and critical data

Embedded controller, GWN.Cloud, and GWN Manager to manage APs

Self power adaptation upon auto-detection of PoE or PoE+

US\$120.00

GWN7660LR - Outdoor Long Range Wi-Fi 6 Access Point

Wi-Fi 6

Up to 250-meter coverage range

Supports 256+ concurrent Wi-Fi client devices

Dual-band 2x2:2 MU-MIMO with DL/UL OFDMA technology

1.77Gbps aggregate wireless throughput and 2x Gigabit Ethernet ports

2 detachable/ changeable antennas for different application scenarios

Self-power adaptation upon auto detection of PoE or PoE+

Advanced QoS to ensure real-time performance of low-latency applications

Anti-hacking secure boot and critical data

Embedded controller, GWN.Cloud, and GWN Manager to manage APs

IP66-level weatherproof capability when installed vertically

US\$97.00

GWN7630 - High-Performance Wi-Fi Access Point

Up to 175-meter coverage range
Supports 200+ concurrent Wi-Fi client devices
Dual-band 4x4:4 MU-MIMO technology
2.33 Gbps wireless throughput and 2x Gigabit wireline ports
Self power adaptation upon auto detection of PoE or PoE+
Advanced QoS to ensure real-time performance of low-latency applications
Anti-hacking secure boot and critical data
Embedded controller, GWN.Cloud, and GWN Manager to manage APs

US\$122.00

GWN7630LR - Outdoor Long Range Wi-Fi Access Point

Up to 300-meter coverage range
Supports 200+ concurrent Wi-Fi client devices
Dual-band 4x4:4 MU-MIMO technology
2.33 Gbps wireless throughput and 2x Gigabit wireline ports
4 detachable external antennas
Self power adaptation upon auto detection of PoE or PoE+
Advanced QoS to ensure real-time performance of low-latency applications
Anti-hacking secure boot and critical data
Embedded controller, GWN.Cloud, and GWN Manager to manage APs
IP66-level weatherproof capability when installed vertically

US\$71.00

GWN7625 - Indoor Wi-Fi Access Point

Up to 165-meter coverage range
Supports 200+ concurrent Wi-Fi client devices
4x4:4 MU-MIMO technology (5Ghz) & 2x2:2 MU-MIMO technology (2.4Ghz)
2.03 Gbps wireless throughput and 2x Gigabit wireline ports
Self power adaptation upon auto detection of PoE or PoE+
Advanced QoS to ensure real-time performance of low-latency applications
Anti-hacking secure boot and critical data
Embedded controller, GWN.Cloud, and GWN Manager to manage APs

US\$68.00

GWN7624 - Indoor Wi-Fi Access Point

Up to 100-meter coverage range
Supports 200+ concurrent Wi-Fi client devices
4x4:4 MU-MIMO technology (5Ghz) & 2x2:2 MU-MIMO technology (2.4Ghz)
2.03 Gbps wireless throughput and 4x Gigabit wireline ports
Self power adaptation upon auto detection of PoE or PoE+
Advanced QoS to ensure real-time performance of low-latency applications
Anti-hacking secure boot and critical data
Embedded controller, GWN.Cloud, and GWN Manager to manage APs

US\$72.00

GWN7615 - Enterprise Wi-Fi Access Point

Up to 175-meter coverage range
Supports 200+ concurrent Wi-Fi client devices
Dual-band 3x3:3 MIMO technology
1.75 Gbps wireless throughput and 2x Gigabit wireline ports
Self power adaptation upon auto detection of PoE or PoE+
Advanced QoS to ensure real-time performance of low-latency applications
Anti-hacking secure boot and critical data
Embedded controller, GWN.Cloud, and GWN Manager to manage APs

US\$62.00

GWN7605 - Mid-Tier Wi-Fi Access Point

Up to 165-meter coverage range
Supports 100+ concurrent Wi-Fi client devices
Dual-band 2x2:2 MU-MIMO technology
1.27 Gbps wireless throughput and 2x Gigabit wireline ports
Support 802.3af Power-over-Ethernet (PoE)
Advanced QoS to ensure real-time performance of low-latency applications
Anti-hacking secure boot and critical data
Embedded controller, GWN.Cloud, and GWN Manager to manage APs

US\$85.00

GWN7605LR - Outdoor Long-Range Wi-Fi Access Point

1.27Gbps aggregate wireless throughput and 2x Gigabit wireline ports
Dual-band 2x2:2 MU-MIMO with beam-forming technology
Self power adaptation upon auto-detection of PoE or PoE+
Supports 100+ concurrent Wi-Fi client devices
Up to 250-meter coverage range
Advanced QoS to ensure real-time performance of low-latency applications
Anti-hacking secure boot and critical data/control lockdown

US\$51.00

GWN7602 - Wi-Fi AP with Integrated Ethernet Switch

Up to 100-meter coverage range
Supports 80+ concurrent Wi-Fi client devices
Dual-band 2x2:2 MIMO technology
1.17 Gbps wireless throughput, 1x Gigabit and 3x 100Mbit wireline speed
Self power adaptation upon auto detection of PoE/PoE+ and PSE
Advanced QoS to ensure real-time performance of low-latency applications
Anti-hacking secure boot and critical data
GWN.Cloud and GWN Manager to manage APs

Routers

US\$51.00

GWN7052/ Dual-Band Wi-Fi Router

1.27Gbps aggregate wireless throughput with 5x auto-sensing Gigabit ports Dual-band 2x2:2 MU-MIMO
Built in VPN Support
Supports 100+ concurrent Wi-Fi client devices
Supports mesh networking with Grandstream APs
Anti-hacking secure boot and critical data
Secure cloud provisioning with GWN.Cloud
Rich firewall features including Anti-DoS, traffic rules, NAT and ALG

US\$88.00

GWN7062 - Wi-Fi 6 Dual-Band Router

Wi-Fi 6
1.77Gbps aggregate wireless throughput with 5x auto-sensing Gigabit ports Dual-band 2x2:2 MU-MIMO
Built in VPN Support
Supports 256+ concurrent Wi-Fi client devices
Supports mesh networking with Grandstream APs
Anti-hacking secure boot and critical data
Secure cloud provisioning with GWN.Cloud
Rich firewall features including Anti-DoS, traffic rules, NAT and ALG

US\$55.00

GWN7002 - Multi-WAN Gigabit VPN Router

2.2Gbps NAT throughput and 600Mbps IPsec VPN throughput
1x Gigabit port with IEEE 802.3af/at PoE Input and 2x Gigabit ports with 48V Passive PoE output or IEEE802.3af
2 x Gigabit SFP ports and 4 x Gigabit Ethernet ports
Multiple WAN ports with load balancing and failover
Built in VPN Support
50 concurrent VPN tunnels
256MB RAM, 256MB Flash, 30K NAT sessions
Advanced QoS to ensure real-time performance of low-latency applications
Secure cloud provisioning with GWN.Cloud
Rich firewall features including DDNS, port forwarding, DMZ, UPnP, Anti-Dos, traffic rules, NAT and ALG
Embedded controller can manage itself and up to 150 GWN Series APs

GWN7003 - Multi-WAN Gigabit VPN Router

US\$79.00

2.2Gbps NAT throughput and 600Mbps IPsec VPN throughput
 1x Gigabit port with IEEE 802.3af/at PoE Input and 2x Gigabit ports with 48V Passive PoE output or IEEE802.3af
 2 x Gigabit SFP ports and 9 x Gigabit Ethernet ports
 Multiple WAN ports with load balancing and failover
 Built in VPN Support
 100 concurrent VPN tunnels
 512MB RAM, 256MB Flash, 60K NAT sessions
 Advanced QoS to ensure real-time performance of low-latency applications
 Secure cloud provisioning with GWN.Cloud
 Rich firewall features including DDNS, port forwarding, DMZ, UPnP, Anti-Dos, traffic rules, NAT and ALG
 Embedded controller can manage itself and up to 150 GWN Series APs

Switches

GWN7800 Series - Layer 2+ Managed Switch

- **GWN7803- US\$155.00**
- **GWN7803P - US\$252.00**
- **GWN7802- US\$132.00**
- **GWN7802P- US\$207.00**

Network Management

GWN.Cloud and GWN Manager

Free Cloud platform: GWN.Cloud (visit gwn.cloud)
 Free software: GWN Manager
 Complete scalability with no limits on the number of AP, sites, or groups
 Access either platform via the web user interface or mobile app for iOS and Android
 Comprehensive network monitoring and reporting, captive portals and more
 High reliability (GWN.Cloud hosted by Amazon Web Services (AWS))
 Bank-grade TLS encryption from end-to-end
 X.509 certificate-based authentication

HT Series Analog Telephone Adapters

Making integrated IP solutions easy and manageable, the HT Series of Analog Telephone Adapters are trusted and deployed by some of the largest service providers in the world. Integrate individual analog phones to a home or office environment with these simple-to-deploy solutions.

Common Deployments

SMB

Residential

Retail

Education

Key Features

TLS & SRTP encryption technology

Automated provisioning options

Gigabit

Models available with Gigabit ports

Built-in Failover SIP server

Supports T.38 fax

Advanced VoIP telephony features

Trusted by the Largest Service Providers in the World

Grandstream is the world's leading provider of ATAs. Many of the world's top service providers rely on our ATAs, which have been the industry standard for almost 15 years. This series offers a range of devices with various amounts of color-coded FXS ports, available NAT routers, voice conferencing support, and more. If you are looking to integrate analog devices with a VoIP network, the HT Series is your ideal choice.

US\$13300

HT818 - 8 Port FXS Gateway with Gigabit NAT Router

Supports 2 SIP profiles and 8 FXS ports and dual gigabit ports
 Strong AES encryption with security certificate per unit
 Automated & secure provisioning options include TR069
 3-way voice conferencing per port
 Exceptional voice quality with wide-band HD codec
 Supports T.38 Fax for reliable Fax-over-IP
 High performance NAT router

US\$85.00

HT814 - 4 Port FXS Gateway with Gigabit NAT Router

Supports 2 SIP profiles through 4 FXS ports and dual Gigabit ports
 TLS and SRTP security encryption technology to protect calls and accounts
 Automated provisioning options include TR-069 and XML config files
 3-way voice conferencing per port
 Exceptional voice quality with wide-band HD codec
 Supports T.38 Fax for reliable Fax-over-IP
 Includes a built-in NAT router which can handle routing speeds up to 100MBps
 Failover SIP server auto switches to second server if main server loses connection

US\$63.00

HT813 - Hybrid ATA with FXS and FXO ports

Supports 2 SIP profiles through 1 FXS port and 1 FXO port
 TLS and SRTP security encryption technology to protect calls and accounts
 Automated provisioning options include TR-069
 3-way voice conferencing per port
 Exceptional voice quality with wide-band HD codec
 Supports T.38 Fax for reliable Fax-over-IP
 Includes a built-in NAT router
 Failover SIP server auto switches to second server if main server loses connection
 Lifeline support (FXS port will be hard-relayed to FXO port) in case of power fail

US\$46.00

HT812 - 2 Port ATA with Gigabit NAT Router

Supports 2 SIP profiles through 2 FXS ports and dual Gigabit ports
 Includes a built-in NAT router which can handle routing speeds up to 100MBps
 TLS and SRTP security encryption technology to protect calls and accounts
 Automated provisioning options include TR-069 and XML config files
 Supports 3-way voice conferencing
 Failover SIP server auto switches to second server if main server loses connection
 Supports T.38 Fax for creating Fax-over-IP

US\$39.00

HT802 - 2 Port ATA

Supports 2 SIP profiles through 2 FXS ports and a single 10/100Mbps port
TLS and SRTP security encryption technology to protect calls and accounts
Automated provisioning options include TR-069 and XML config files
Supports 3-way voice conferencing
Failover SIP server auto switches to second server if main server loses connection
Supports T.38 Fax for creating Fax-over-IP

US\$35.00

HT801 - 1 Port ATA

Supports 1 SIP profile through a single FXS port and a single 10/100Mbps port
TLS and SRTP security encryption technology to protect calls and accounts
Automated provisioning options include TR-069 and XML config files
Supports 3-way voice conferencing
Failover SIP server auto switches to second server if main server loses connection
Supports T.38 Fax for creating Fax-over-IP

GXW Series VoIP Gateways

The GXW VoIP Gateway Series enables businesses to integrate traditional phone systems with VoIP networks to efficiently manage communication costs and create streamlined networks. The GXW Series is designed for full interoperability with leading IP-PBXs, Softswitches and most SIP-based environments and its various models offer support for analog or digital VoIP networks.

Common Deployments

Key Features

Gigabit

Models available with Gigabit ports & NAT routers

TLS & SRTP encryption technology

Grandstream Device Management System (GDMS)

Key Features

Configuration, management & monitoring of devices, accounts & firmware

Real-time device & network monitoring; analytical system reports

Manage devices by site, group, model, etc.

TLS, certificate validation and more

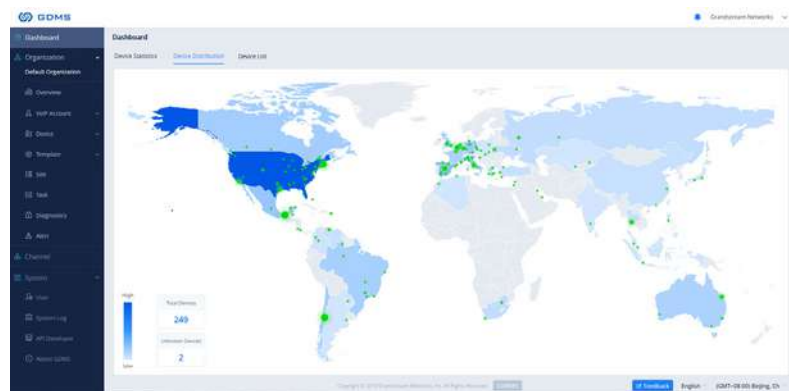

Configurable notifications, intelligent alarms & automatic troubleshooting

Intelligent troubleshooting identifies problems & provides diagnostic reports

Zero-Touch Provisioning and Management

The Grandstream Device Management System (GDMS) is a zero-touch cloud provisioning and management system that provides easy-to-use enterprise-level tools to manage Grandstream products before, during and after deployment. It provides a centralized interface to provision, manage, monitor and troubleshoot. GDMS is ideal for enterprises, service providers and multi-site businesses as it allows them to easily deploy and manage large networks of Grandstream solutions. Visit gdms.cloud to sign up.

GHP Series Compact Hotel Phones

The GHP series of Compact Hotel Phones features simple, easy-to-use IP phones for any hotel room that can be programmed and customized based on the needs of the hotel and their guests. This Series features 8 model options to fit all needs with available Wi-Fi, white and black color options, faceplates that can be customized with any hotel's logo, and more. The GHP Series is supported by Grandstream's Device Management System (GDMS), which provides a centralized cloud interface to setup, provision and manage the GHP Series.

provisioning

Programmable and Customizable Compact IP Phones

The GHP Series are Compact Hotel Phones that are simple, sleek, and easy-to-use while allowing hotels to customize them based on their needs. This Series features 8 models that all support 2 lines/2 SIP accounts, 3-way audio conferencing, cloud management and high-end security features while providing an HD speakerphone. With available Wi-Fi models, black and white model options, and cloud provisioning with GDMS, the GHP Series offers the ideal model for every hotel.
